Sina Bastani

Software Developer

☏ (+46) 700128299 | ✉ sina@sinabastani.dev | ⌨ sina96 | ⚇ sinabastani.dev

Profile

Senior Backend Developer with 5+ years of experience in large-scale e-commerce platforms. Specialized in Java and Spring-based distributed systems, SAP Commerce Cloud, cloud migration, secure payment integrations, and CI/CD modernization. Experienced in cloud-based architectures, test-driven development, and secure system integrations in high-traffic production environments. Actively leverage AI-assisted development workflows to enhance refactoring, test generation, and architectural exploration while maintaining strong engineering judgment and code quality standards.

Education

Stockholm University   Stockholm, SE

B.S. in Computer & Systems science   09/2017 - 06/2020

Employments

Vass Consulting Sweden   2020 - *Present*

- Software developer Consultant

Stockholm University   2018 - 2020

- Workshop Manager & Tutor

Adela Omsorg   2017 - 2020

- Office Adminstration (part time)

Selected Projects

Axfood IT - E-Com B2B Web Team   06/2025 - *Present*

Role: Backend Developer

- Backend developer in Snabbgross mainly focused on the Cloud migration and modernization project.
- Executed migration from Sonic MQ to AWS SQS with event-driven architecture principles. Implemented mTLS-secured communication for internal integrations. Moved from Jenkins to Bitbucket Pipelines with functional CI/CD towards SAP CCV2.
- Designed and implemented performance testing strategy using Grafana k6. Established baseline performance metrics for Cloud migration project.
- Reduced technichal debts by aligning Spring dependencies and API definitions with updated standards.
- Contributed to new feature development, maintenance and code review loops.
- Participated in requirement refinement and technical solution discussions with cross-functional teams.
- Tech: Java, Spring, SAP CCV2, Dynatrace, AWS S3 SQS, Grafana k6, REST API, mTLS Connections, Bitbucket Pipelines.

Axfood IT - E-Com B2C App Team   04/2023 - 05/2025

Role: Backend Developer

- Led backend development for a complete redesign of the Willys app, migrating to React Native. Implemented BankID login using OAuth2 for secure authentication
- *Scan&Go* Feature: Maitaining in-app barcode scanning feature and integrated Swish as a payment method. Handling production issues with internal or external integrations.
- Contributed to new feature development, backend maintenance, and support for Hemköp's mobile app.
- Tech: Java, Spring, SAP Hybris, OAuth2, AWS, React Native, REST API, BankId, Swish, SwedBank Pay, Klarna, Extenda integrations.

Axfood IT - E-Com B2C Web Dev   03/2022 - 03/2023

Role: Backend Developer

- Developed integration between SAP Hybris and Cloudinary to centralize image storage. Optimized legacy media and improved database performance and cost efficiency within S3 media
- Ongoing development and maintenance for Willys and Hemköp's web and mobile e-commerce systems. Focus on new features, performance, and integration.
- Tech: Java, SAP Hybris, Apache Ant, Spring, REST API, AWS, Groovy, Jenkins, Bitbucket Pipelines, Atlassian, Git

Axfood IT - E-Com API Test Automation   03/2022 - 03/2023

Role: Junior Backend Developer

- Created comprehensive integration and system tests for REST APIs to improve platform stability
- Tech: Java, Spring, JUnit, Mockito, SAP Hybris, Bitbucket, Git

Gastrofy (Northfork) - Front-end development   03/2021 - 05/2021

Role: Junior Frontend Developer

- Built reusable frontend services and widgets for an online recipe platform.
- Tech: React, TypeScript, SASS, Figma

Skills & Merits

Certificates: AWS Certified Solutions Architect Associate
Programming Languages: Java 17-25, JavaScript, SQL, Groovy, Kotlin, Python, HTML/CSS, .Net
Tools and Frameworks: Spring 5/6, JUnit 4/5, Git, REST, SOAP, Postman, React, TypeScript, Swagger, SAP Commerce, AWS Console, Docker, Scrum, Kanban
Knowledge in LLM-based coding assistants: Claude Code, Warp, OpenCode, Cursor, Codex
Languages: Swedish (fluent), English (fluent)
