

Sina Bastani

Software Developer

☎ (+46) 700128299 | ✉ sina@sinabastani.dev | 💻 sina96 | 👤 sinabastani.dev

Profile

Senior Backend Engineer with 5+ years of experience building scalable cloud-native commerce systems for high-traffic e-commerce platforms. Specialized in Java and Spring-based distributed systems, cloud migration, secure payment integrations, asynchronous messaging, and CI/CD modernization in production environments.

Experienced in designing and maintaining backend services, REST APIs, event-driven integrations, authentication flows, and operational tooling across large-scale commerce ecosystems. Strong focus on system reliability, maintainability, performance, and engineering quality.

Actively leverage AI-assisted and agentic development workflows using modern coding agents and LLM-based tooling to accelerate refactoring, test generation, architectural exploration, debugging, and developer productivity while maintaining strong engineering judgment and code quality standards.

Education

Stockholm University	Stockholm, SE
B.S. in Computer & Systems science	09/2017 - 06/2020

Employments

Vass Consulting Sweden	2020 - Present
◦ Software developer Consultant	
Stockholm University	2018 - 2020
◦ Workshop Manager & Tutor	
Adela Omsorg	2017 - 2020
◦ Office Administration (part-time)	

Selected Projects

Axfood IT - E-Com B2B Web Team	06/2025 - Present
Role: Backend Developer	
◦ Backend developer in Snabbgross mainly focused on the Cloud migration and modernization project focused on scalable distributed commerce systems.	
◦ Executed migration from Sonic MQ to AWS SQS using event-driven architecture principles and asynchronous messaging patterns.	
◦ Implemented mTLS-secured communication for internal integrations and modernized CI/CD workflows from Jenkins to Bitbucket Pipelines for SAP CCV2 deployments.	
◦ Designed and implemented performance testing strategy using Grafana k6 and established baseline metrics for cloud migration readiness and scalability validation.	
◦ Reduced technical debts by aligning Spring dependencies and API definitions with updated standards.	
◦ Contributed to new feature development, maintenance and code review loops.	
◦ Participated in requirement refinement and technical solution discussions with cross-functional teams.	
◦ Tech: Java, Spring, SAP CCV2, Dynatrace, AWS S3 SQS, Grafana k6, REST API, mTLS Connections, Bitbucket Pipelines.	
Axfood IT - E-Com B2C App Team	04/2023 - 05/2025
Role: Backend Developer	
◦ Led backend development for a complete redesign of the Willys app, migrating to React Native.	
◦ Implemented secure BankID authentication flows using OAuth2 and integrated payment services including Swish, Klarna, and Swedbank Pay.	
◦ Maintained and improved Scan & Go functionality, including barcode scanning, payment integrations, and production issue resolution across internal and third-party systems.	
◦ Contributed to backend feature development, maintenance, operational support, and integration reliability for Hemköp and Willys mobile commerce platforms.	
◦ Tech: Java, Spring, SAP Hybris, OAuth2, AWS, React Native, REST API, BankId, Swish, SwedBank Pay, Klarna, Extenda integrations.	

Axfood IT - E-Com B2C Web Dev

03/2022 - 03/2023

Role: Backend Developer

- Developed integration between SAP Commerce and Cloudinary to centralize media storage and improve operational efficiency.
- Optimized legacy media handling, reducing database load and improving S3 storage cost efficiency.
- Worked on feature development, backend maintenance, integrations, and performance improvements for Willys and Hemköp e-commerce systems.
- Contributed to CI/CD workflows and release processes in a cloud-oriented development environment
- Tech: Java, SAP Hybris, Apache Ant, Spring, REST API, AWS, Groovy, Jenkins, Bitbucket Pipelines, Atlassian, Git

Axfood IT - E-Com API Test Automation

10/2021 - 03/2022

Role: Junior Backend Developer

- Developed integration and system tests for backend REST APIs to improve platform stability and deployment confidence.
- Contributed to improving backend quality assurance processes in a distributed commerce environment.
- Tech: Java, Spring, JUnit, Mockito, SAP Hybris, Bitbucket, Git

Gastrofy (Northfork) - Front-end development

03/2021 - 05/2021

Role: Junior Frontend Developer

- Built reusable frontend services and widgets for an online recipe platform.
- Tech: React, TypeScript, SASS, Figma

Skills & Merits

Certificates: AWS Certified Solutions Architect Associate

Programming Languages: Java 17-25, JavaScript, SQL, Groovy, Kotlin, Python, HTML/CSS, .Net

Tools and Frameworks: Spring 5/6, JUnit 4/5, Git, REST, SOAP, Postman, React, TypeScript, Swagger, SAP Commerce, AWS Console, Docker, Scrum, Kanban, Agentic Workflows.

AI-Assisted & Agentic Engineering Workflows: Claude Code, Cursor, Codex, Warp, OpenCode, Pi, AI-assisted refactoring, automated test generation, multi-agent coding workflows, AI-driven code review and developer productivity tooling

Languages: Swedish (fluent), English (fluent)
